"Two Geeks From Miami Swear Under Oath Their Stock Trading Robot is Not Illegal!"

... Read About How You Could Use This Robot to Earn Thousands of Dollars:

Article by: Tony Evans

What I am about to share with you, is a very unusual story.

Unusual... because it is about 2 "geeks", named Michael and Carl. Who developed the first commercially available stock picking "robot". Michael (the programmer) named the robot "Marl".

Marl came about after Michael developed the famous "Global Alpha" computer stock trading model, while contracted to Goldman Sachs.

Above: Carl and Michael Programming "Marl"

A piece of software which most years is responsible for...

$4,000,000,000+ Annual Trading Profit

With this software project completed, Michael looked for a new way to line his pockets. Unfortunately he had signed a Non Compete and NDA agreement with Goldman Sachs, forbidding him to create software which trades derivatives and similar financial instruments (like Global Alpha).

After 3 weeks of being temporarily unemployed, Michael who was very wealthy and very bored... Decided to start a new project.

You' see Goldman Sachs and most other large investment funds are at a major disadvantage. They often manage portfolios of up to $10,000,000,000 (ten billion dollars) - and because of this when they invest in stocks their scope is limited to just a few of the worlds largest firms (Coca-Cola, Google).

This problem is widespread amongst fund managers whom manage large amounts of capital. In fact Warren Buffet (Whom manages $53 billion) has the exact same problem.

How to Find Stocks Which Will Double...

your privacy and not share this information.

Michael knew he could take advantage of this. By developing software which can run on any home computer, and manage funds between $100 and $500,000.

With managing such a small comparative amount, Michael's software could yield much higher returns. In fact it is designed to trade in the volatile penny stock market where stocks can increase 400% in a matter of minutes.

Watch as Owners of Marl Make $5192...
...Live on Video

Below is a video. Showing Marl in action.

You'll see the stock Marl chose, and watch to the end where Michael shows you what happened the next day...

Michael worked with fund manager Carl Williamson to create the bot. "Marl" works by analysing each stock using "technical analysis". Which means analysing a stocks past price movements to predict the stocks future direction.

Below is an example stock chart. For all it looks like something NASA would be proud of... it is merely showing the stocks changes in price against time.

The various changes in price (when made into a chart) form what traders call "chart patterns" and it is exactly these price patterns Marl is looking for.

When first activated, Marl will use its own database to perform a scan of stocks trading on the OTC and Pink sheet exchanges. During this time Marl is looking for companies whom are forming bullish trading patterns.(stocks about to increase)

Carl helped Michael program the bot to identify (in split second timing) distinct trading patterns from a vast range of 6578, held in Marl's internal database.

If Marl identifies a clean, uncongested chart pattern, that is proven to yield a good risk/reward - Then the stock will be added to Marl's "Watch List". All of these "watched stocks" will be forming bullish patterns (indicating the stock is about to rise).

This watch list has two distinct advantages. The first and most obvious is that Marl can easily monitor hundreds of stocks at the same time. The second is that Marl is programmed on an "evolutionary framework". What this means, is that as Marl is watching hundreds of stock patterns it actually learns the most likely direction of stock prices under thousands of situations.

Because of this. The longer Marl is allowed to run on a computer...

The More Advanced He Becomes!

What's more by scrutinising the miniscule movements in price of hundreds of stocks... Marl becomes familiar... even intimate... With each individual stock.

Developing what professional traders call a "sixth sense". A sort of "feel" for how the stock will behave in any given situation.

While monitoring hundreds of stocks in the watch list... Marl may notice that a stock has been hitting resistance at $0.50 all week (not being able to rise above 50 cents a share). And if the stock breaks that level (meaning there is a good chance it will "breakout" and run much higher) the bot will start analyzing the stock in more detail... looking at its longer term weekly trading pattern and applying its vast range of criteria.

Any stocks that reach this stage have been under close scrutiny and passed a variety of complex tests. Marl will then analyze the charts looking for the best entry point (to buy the stock at) with the lowest risk to potential reward.

The average professional stock trader can analyze one stock chart around every 8-10 seconds... when looking for an opportunity. On the other hand Marl can analyze 7 charts every second.

Why Does That Matter?

It means that Marl can be extremely selective, waiting until all the correct criteria line up until a trade recommendation is made.

Often Marl will disregard profitable trades... In favour of a potentially more profitable trade occurring at the same time.

After creating Marl to version 1.0... The two input a trading capital of $1000 and set it running. Marl spent 13 hours analysing over 6,000 small capitalisation firms. After those 13 hours Marl made his first ever stock recommendation...

LPTC.OB Trading at $0.74 Per Share

Carl placed the trade in his online brokerage account with $1000 invested, as the market closed for the night. The following morning (a Tuesday) the stock climbed to $1.05 within the first 3 hours (a 42% increase).

Something ‘magical’ had just happened. In Carl Williamson’s dark, damp basement the first ever profitable stock robot was created.

Computer Science Universities around the country had attempted this feat for years with no avail. They lacked one crucial thing, these students only had a basic grasp of stock trading - Let alone the complex thinking and analysis involved.

Carl Williamson was vital to Marl's success and so on that day. The 16th of January 2007. Michael and Carl signed a legally binding contract. Both swore themselves to "secrecy". No one would know about Marl. Not Carl's trading partners... Not Michael's old Global Alpha colleagues... Not anyone.

Within the next few days Carl and Michael rented a commercial lock-up where their new business was to be stationed. They drove to the nearest PC World and bought 12 brand new laptops.

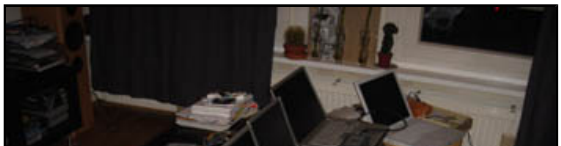
Back at the lock-up Michael set-up a wireless network and configured each laptop. They spent the first night setting up each laptop v1.1 of Marl the trading robot. Yes you guessed it...

Carl & Michael Were Setting Up A Lockup To House Marl... Marl Was To Analyse the Markets... 24 Hours a Day!

By setting up Marl on a network, with 12 versions of "himself" running at the same time - His internal database of chart trading patterns was able to grow at a much faster rate.

Each bot was linked to one central database, held on a separate server, and hosted online.

Carl & Michael Were Set For Riches!



The second day after 12 sets of Marl analysed over 17,000 small cap firms... Marl made

It's Second Stock Recommendation...

Marl recommended another stock named NSMG.OB. Carl once again placed the trade online, this time investing $1380 using the profits made on the last trade.

Within 3 days time the stock had rocketed from $1.12 per share to $3.42. In total a 205% increase in just a matter of days.

In fact by this point the two were so excited they slept on the floor in the lockup. Watching as Marl analysed hundreds of thousands more stocks.

Michael (the programmer) has insisted I include some technical details pertaining to his 'masterpiece' in this article, here they are:

- Marl can process 1,986,832 mathematical calculations per second.
- As explained the more Marl is used the better his skills will become; every situation it analyses is fed back to an online "master database" which also gauges the performance of its actual stock picks. The result is a bot which is constantly perfecting its trading formula.
- Marl doesn't just compare each trade to past situations. It also looks at volume traded, Support and resistance levels, Trend reversals patterns, Consolidation patterns and Channels a stock trades in. - Marl takes all of this into account before even watching a certain stock.

Carl went on to explain that Marl is a simple bot. And unlike the computer science universities currently trying to create programs like Marl. Michael and Carl were adamant their stock robot would be extremely simple. It is simple in design and simple in programming. For the end user this means there are virtually no errors or bugs, which could prove financially fatal.

Below is a Screenshot of Carl's online Brokerage account after using Marl for 9 days:

Now as explained above, Marl is the first "Commercially available" stock trading robot. And since its introduction in early 2007, Marl has been responsible for creating 86 millionaires and 13 multi-millionaires.

And because of this a license to use Marl is no "cheap date".

In fact it costs...

$28,000 Per License!

And each person who purchases a license is invited to Michael's home for a week of personal training.

Now Michael did go on to tell me something very interesting. Stay with me on this because I'm about to tell you how anybody can benefit from Marl... Without shelling out $28,000.

You' see Michael and Carl know that not many people have $28,000 to "risk" on buying a Stock Trading Robot. And so they thought for days about how they could prove Marl is

everything I have explained, without giving him away on some sort of "trial basis".

So they created a weekly newsletter, named "Doubling Stocks". Each week every reader of that newsletter would receive one Penny Stock pick chosen by Marl.

And so far since the newsletter was started 4 months ago... Each pick has made an...

Average 105.28% Increase, Usually Within 3 Hours of the Market Opening!

Just take a look at the impressive results "Doubling Stocks" subscribers have experienced since early this year:

Stock	Recommended Buy Price	Recommended Sell Price	Percentage Change
BioStem Inc. (BTEM.OB)	$0.46 (March 2007)	$2.34 (March 2007)	**+408%**
LANTIS LASER INC (LLSR.PK)	$0.49 (April 2007)	$0.42(May 2007)	**-14%**
SUPERCLICK INC (SPCK.OB)	$0.11 (May 2007)	$0.24(June 2007)	**+118%**
DHANOA MINERALS LTD (DHNA.OB)	$1.00 (May 2007)	$1.55(May 2007)	**+55%**
SUSTAINABLE POWER CP (SSTP.PK)	$0.05 (June 2007)	$0.12 (June 2007)	**+140%**
BIOQUEST TECHNOLOG (BQTG.PK)	$0.37 (June 2007)	$0.72 (June 2007)	**+94%**
HOLLOMAN ENERGY CORP (HENC.OB)	$1.52 (July 2007)	$1.95 (July 2007)	**+28.28%**
INTL OIL & GAS NEW (IOGH.PK)	$0.14 (July 2007)	$0.11 (July 2007)	**-21%**
Platina Energy Group, Inc. (PLTG.OB)	$0.13 (August 2007)	$0.22 (September 2007)	**+69%**
NATCO INTL INC (NCII.OB)	$1.63 (August 2007)	$2.24 (August 2007)	**+37%**
Voyager Petroleum, Inc. (VYGO.OB)	$0.06 (October 2007)	$0.08 (October 2007)	**+33%**
NATURALLY IOWA INC (NLIA.PK)	$0.21 (October 2007)	$0.40 (October 2007)	**+90%**
Tara Gold Resources (TRGD.PK)	$0.48 (October 2007)	$0.80 (October 2007)	**71%**
HEALTHSONIX INC (HSXI.PK)	$0.15 (October 2007)	$0.22 (October 2007)	**46%**
HOLLOMAN ENERGY CORP (HENC.OB)	$0.94 (November 2007)	$1.17 (November 2007)	**24%**
SHIMING US INC (SGUS.OB)	$0.47 (November 2007)	$0.77 (November 2007)	**63%**
Skinvisible Inc. (SKVI.OB)	$0.18 (December 2007)	$0.15 (December 2007)	**-20%**
Idglobal Corp (IDGJ)	$0.12 (January 2008)	$0.31 (January 2008)	**+158%**
Exact Energy Resources Inc (EXER)	$0.45 (January 2008)	$0.33 (January 2008)	**-26%**
Material Technologies Inc (MTTG)	$0.58 (January 2008)	$1.01 (January 2008)	**+74%**
China Health Resources Inc (CHRI)	$0.085	(February 2008) $0.20 (February 2008)	**+135%**
Scenario Sys Intl Inc (SSII)	$0.63 (February 2008)	$0.52 (February 2008)	**-17%**
Eternal Image Inc (ETNL)	$0.032 (March 2008)	$0.047 (March 2008)	**+47%**

Now here's where it gets most interesting.

Because when Michael and Carl were telling me about this new newsletter, I was expecting them to mention a price in the thousands of dollars...

$5000, $6000 or More

They went on to tell me they were offering a membership to this newsletter at just a token fee of $47.00! And better yet this token fee of $47.00 will allow you to trade Marl's picks for the lifetime of the newsletter.

Why?

Because Carl told me:

"This newsletter is the best kind of advertising available. Thousands of people read the email each week and witness returns consistently averaging 80%+"

"And we priced the newsletter at $47.00 simply to ensure those who join are serious about investing in each stock pick".

And because of this $47 newsletter, Marl has already been featured in Business Week and the Wall Street Journal.

Just take a look at these stock graphs. Just a few of the trades Marl has picked in the past 5 months:

Above: One of Michael's Personal Favourites!

Above: In total Michael's subscribers earned an estimated $192,392 from this pick.

Above: Michael told me this one was quite risky, but it certainly paid off.

In fact, Carl tells me 3.2% of members of this newsletter, end up buying Marl outright.

Why would they pay such a large amount to buy their own Marl when they can simply follow the newsletter?

Because Marl usually predicts at least 2 good stocks per day. And owners of the software can make 10 or more investments per week, unlike members of the newsletter.

There is one more caveat. Members of the newsletter are expected to report back to Michael and Carl details of their entry point, exit point and profit/loss (if they decide to trade that week).

This data is further used to aid development of Marl.

6 Case Studies of Newsletter Members:

"Altogether I've made $623.56"

Hi,

My name's Ethan, I must admit I was pretty skeptical when reading about DoublingStocks.

Although after reading about the guarantee. I took the plunge, and boy am I glad I did so.

I've now received 4 of the recommended stock trades from Michael. And the average increase has been 84.56%.

Altogether I've made $623.56 with an innitial investment of $150.

And the best part is I started this venture knowing absolutely nothing about trading stocks.

But If you want to email me about doubling stocks I'd be more than happy to talk.

Just send off an email to ethan.paymer@gmail.com

Bye for now

- Ethan Paymer

"Made 164% With CPWE.OB"

Hey Michael,

This is John Zuick. Last week I paid for a subscription to Doubling Stocks. I've read your book The Penny Stock Bible -- And I must say it has cut the learning curve dramatically.

Now on the stock newsletter front, I've only received one pick so far. And that was CPWE.OB, this stock has risen 164% and netted me $1246.00 in clear profit.

Anyway, feel free to stick this video on your website. I'm looking forward to being quasi famous.

Bye for now

- John Zuick
mrjeffwells@yahoo.com

"My goal by June 2007 is $13K a month"

Hey Michael,

Just emailing to say... I've just made $2533.56 minus commissions on your last trade cttd.

Within days of you recommending it, the price tripled. I got out early, as it went up another 89.24% -- But I couldn't be happier.

My goal by June 2007 is $13K a month (A 6 figure salery). With your stock picks continuing to flood my inbox... This is going to be EASY!!!

I don't usually kiss butt, but seriously? Thank you Michael. You really went all out on this course and me, my wife and our 8 month old son really appreciate your dedication to excellence.

Thanks!

- George Barmpalias

"The next best thing besides Warren Buffet"

Thanks to Michael, my friends now believe I'm the next best thing besides Warren Buffet.

In the last 4 months I've made enough money to buy a BMW 3 Series.

Actually I'll be honest I already had enough but the earnings from Michael's newsletter eased my girlfriend onto the idea.

I paid $52,250 for the car. And $38,689.00 of that was directly from penny stocks.

Here's the car:

Now what can I say Michael, other than look at the car I have, because of you. You'll be happy to know I call the car Michael, after you!

- David
no email provided

What you have just read so far, is an overview of what I believe, and obviously what others believe, is the most amazing, exciting and definitely one of the most profitable methods of making money online.

When writing this web article, I initially was simply writing an interesting article about "The First Stock Robot". Although after hearing about Michael and Carls newsletter I thought it was such a great deal I asked to offer the chance to join, straight from this web page.

Michael and Carl did however specify that there was a strict limit on the amount of people I am allowed to let join "Doubling Stocks". And said they had just 486 newsletter spaces left.

If you quickly scroll to the bottom of this page, you'll see a large black number. That number is a countdown of the amount of newsletter subscriber spaces left.

At the time of writing I do not know the current amount, although if it says 0 - Please contact me with your name and email address and I will add you to the waiting list.

But I must also make clear:

This Offer Is NOT For Everybody

In fact, Michael isn't even allowing most people to sign up.

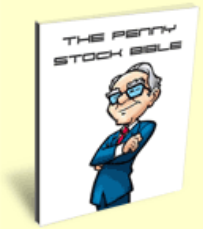
Why?

Because some people cannot cope with any type of loss whatsoever. And, even though Marl gains an average of 105.28% per weekly trade. The bot gets it wrong sometimes. And when it does, people lose money.

Some people think they will never lose when they follow Marl's predictions. But the truth is, occasionally they will lose money. If you trade penny stocks on a... continuing basis, it is 100% certain you will experience losing trades every now and again.

So, if you're the kind of person who is not emotionally stable enough to handle a loss. Then you are not allowed to be a subscriber to Marl's newsletter.

How to Find Stocks Which Will Double...



In Your Inbox, in 20 Seconds...

Just enter your name & email address below and I will instantly email you 2 simple rules (you must strictly follow) in order to discover hot and profitable trades which will double within 23 minutes of the market opening...

Name: Type Name Here

Email: Type Email Here

Send Rules Now!

I hate spam as much as you and promise to carefully guard your privacy and not share this information.

On the other hand, if you have the required amount of courage pumping through your veins... and... you are the kind of person who likes to take scientifically analyzed and carefully calculated risks. Then the "Doubling Stocks" newsletter is exactly what you're looking for.

Another thing to remember is, when you trade penny stocks, it's impossible to lose a penny more than your initial investment.

OK, let's get down to "brass tacks". I already told you, "Doubling Stocks" costs a token amount of $47.00. This subscription will last for as long as the newsletter keeps going (years and years). And this is a one off subscription price, you will never again be rebilled.

Will Michael's newsletter help you? Will his stock picks continue to generate an average of 105.28% profit? Here's how you can find out without risking a single penny...

...Try Michael's Newsletter "Doubling Stocks", Absolutely FREE For 8 Weeks!

If you decide to pay via check. Michael insists you postdate your check for 8 weeks in advance. Or if you decide to pay with credit card... At any point up to 8 weeks after joining you may email "support [at] doublingstocks.com" for a full refund (including processing fees).

As soon as Michael receives your order, He will immediately contact you by email and send your "welcome package". The very next Sunday you will receive your first stock trade.

After that, you've still got 7-1/2 more weeks... to place the trade and see for yourself if it is as profitable as I say it is.

If it isn't, you can simply stop payment on your check or, call Michael... and... He will be happy to send back your uncashed check or refund your full joining fee. This way...

You Will Have Lost... Nothing!

Have you ever heard of anything like that before? There are just too many times in life when people are NOT willing to hold themselves accountable for their own services.

How many people have a stock broker who will guarantee he will make you money... or... he will refund your investment? Is there an attorney who will guarantee he will win your case... or... he will refund your money? Michael is thoroughly willing to make such a statement... and... more than willing to back it up.

In Summary...

From what I have described above. You have a 8 week period where you may try Michael's newsletter. Within those 8 weeks, one email to "support [at] doublingstocks.com" and he will refund your joining fee (including credit card processing fees).

Furthermore, even if you decide you'd like a refund. Michael will still happily send you his stock picks...

That way, whatever the outcome of this...

...You Will Profit!

Above: Michaels Office in Miami

If I'm wrong about all of this, you've lost only a couple of minutes of your time. But what if I'm right?

Oh and by the way Michael's company "Doubling Stocks" is located at 8345 NW 66TH ST #2785, MIAMI FL 33166-2626. That's a couple of blocks from the Miami International Airport, and across the road from the beautiful Lehigh Lake. If you have any questions, you can open a support ticket at his help desk (http://support.doublingstocks.com) or call him on 641-715-3900 (Extension: 5737152#).

If you'd like to stop by at Michael's office, you can drive straight to Miami, Florida. His office (pictured, left) is the building right on the corner. Michael invites all of his subscribers to pop by anytime they are in the area. Monday to Friday, normal working hours.

Try Michael's Newsletter FREE For 60 days! If It Doesn't Earn You Hundreds or Thousands of Dollars... You Will Not Be Charged.

And I'll still let you keep "The Penny Stocks Bible"!

Fair Enough?

Try Doubling Stocks With the....

8 Week "Iron Clad" Guarantee:

Try Michael's Newsletter Without Risk...

14 Places Left on Michael's Newsletter!

$47.00 One Off Subscription Amount Including an 8 Week 100% Money Back Guarantee...
